Parabolic Umbrella

Ignite your creativity

Thanks to the new **parabolic umbrellas**, we make a big step forward towards the ultimate goal of light shaping: absolutely free to create. Highly versatile and extremely portable, parabolic umbrellas generate an endless source of artistic expression.

Different from regular umbrellas, parabolic umbrellas enable better direct control over contrast, saturation, and shadow-edge gradation of the subjects. Ideal for glamor, portraits, or fashion photography, parabolic umbrellas can easily change the character of light by repositioning the light on the rod; choosing between different linings and sizes; attaching diffusers.

Sliver for Defined Looks

A silver lining umbrella lends definition and detail to your subject, as well as natural catchlights. You will have not only illuminated subjects but also precise control on contrast, saturation, and edge. It is perfect for creating a crisp, edgy look. The light can be much softer when the diffuser is used.

Size	Umbrella	Diffuser
Φ 85cm	UB-**85S**	DPU-**85T**
Φ 105cm	UB-**105S**	DPU-**105T**
Φ 130cm	UB-**130S**	DPU-**130T**
Φ 165cm	UB-**165S**	DPU-**165T**

White for Easy Control

White lining umbrellas still offer relatively good control over the light. However, the light is softer than the silver coating and a bit less demanding to work with. Putting the diffuser on it, you get a fascinating window light.

Size	Umbrella	Diffuser
Φ 85cm	UB-**85W**	DPU-**85T**
Φ 105cm	UB-**105W**	DPU-**105T**
Φ 130cm	UB-**130W**	DPU-**130T**
Φ 165cm	UB-**165W**	DPU-**165T**

Translucent for Broad Range

The translucent umbrellas work to broaden and soften the light source. The light reflected by **translucent lining** will be more diffuse than the silver or the white umbrella. Due to the way it works, it could work as a gorgeous fill light or for large scenes.

Size	Umbrella	Diffuser
Φ 85cm	UB-**85D**	DPU-**85BS**
Φ 105cm	UB-**105D**	DPU-**105BS**
Φ 130cm	UB-**130D**	DPU-**130BS**
Φ 165cm	UB-**165D**	DPU-**165BS**

Compact and Portable Design

The parabolic umbrella is lightweight and easy to transport. Each version comes with a specially designed carrying bag that fits both the umbrella and the diffuser.
